

Doris Wedlich

Karlsruhe Institute of Technology (KIT)

Head of the Division Biology, Chemistry and Process Engineering

Trained as molecular biologist Prof. Dr. Doris Wedlich focused her research on signal transduction in cell differentiation and cancerogenesis. From 2001-2011 she was chair of the Institute of Cell and Developmental Biology at the KIT. Since 2012 she moved to the KIT management heading the Division Biology, Chemistry and Process Engineering. Doris Wedlich can refer to several years of committee work for the German Research Foundation and the Science Council. Currently she is engaged to support efficient and

effective data management in materials research and life sciences. 2013 she joined the Council of the Research Data Alliance. Since 2014 she is member of the German Council for Scientific Information Infrastructures with focus on international networking.

Doris Wedlich interest in the biography of Fritz Haber results from the conflict, how to deal with the person Fritz Haber representing the successful Karlsruher tradition of Chemistry and Process Engineering but also being the enabler and promotor of the gas war.
