

Prof. Marcus Popplow

Marcus Popplow is Full Professor for history at the Institute of Technology Futures at KIT. After his Ph.D. in Bremen on early modern engineers' invention of a new discourse on machine technology (1997) he held Postdoc-positions at the Max-Planck-Institute for the History of Science in Berlin (1997-2002), Brandenburg Technical University Cottbus and the University of Salzburg. Before joining the KIT in 2016, he was Professor for the history of technology at the Technical University Berlin.

His research interests focus on the history of technology in pre-modern and modern times, in particular on public communication on technology, mobility history, the history of the engineering profession, historical dimensions of technical knowledge and the relation between the history of technology and technology futures.

His book publications comprise a history of medieval technology as well as a biography of Felix Wankel, inventor of the rotary engine. Popplow is on the editorial board of the scientific journal „Technikgeschichte“ and vice-chairman of the „Gesellschaft für Technikgeschichte“.
